The future of communications technology is right around the corner

As part of our network upgrade plan, **F&B Communications** is bringing Fiber to the Home (FTTH). This means the installation of fiber optic cables (made of very thin glass fibers) to carry digital information directly to homes and businesses. FTTH technology will allow F&B customers to receive advanced phone, Internet and television services over the same fiber optic line, greatly enhancing the quality and performance of all three. In addition to providing you the latest in communications technology, homes served by FTTH equipment carry increased value at resale.

Our main line construction is nearly complete and technicians from F&B will now begin installing service drop conduits in your neighborhood. The second phase of this multi-step project includes the installation of a 1-inch diameter orange underground conduit from our service distribution box to your residence.

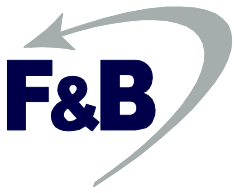

There is no cost to you to have the fiber optic conduit and cable installed to your home or business during this initial construction phase. If you decide to decline the installation at this time, there may be fees or charges at a later date. **The installation of the fiber optic conduit to your home will not result in a direct increase in charges for services you may currently subscribe to unless you choose to upgrade to more advanced services as they become available.**

Prior to construction beginning on your property, our technicians will be contacting Iowa One Call to have underground utilities marked. If you are aware of private electrical service lines or underground fuel tanks and gas lines on your property, we ask that you inform our technicians in advance so they can be avoided during construction.

Please keep in mind the FTTH upgrade is a multi-phase project. Electronic equipment will also need to be installed outside your home at a later date.

IN ORDER TO ALLOW F&B COMMUNICATIONS TO PROCEED WITH THE CONSTRUCTION OF A FIBER OPTIC CONDUIT AND CABLE TO YOUR HOME, PLEASE SIGN THE ATTACHED CONSTRUCTION ACKNOWLEDGMENT FORM AND RETURN TO OUR OFFICE AS SOON AS POSSIBLE OR CALL 563-374-1236 FOR ADDITIONAL INFORMATION.

Thank you!
